SECTION 104: RC (Rural Conservation) District

A. Purpose

The Rural Conservation District is established to conserve farmland and to encourage agricultural activities, thereby helping to ensure that commercial agriculture will continue as a long term land use and a viable economic activity within the County. The RC District is also established to preserve natural features and the rural landscape, while allowing low density, clustered residential development. Residential development is to be permitted only when it is located and designed to minimize its impact on agricultural land, farming operations, and sensitive environmental features; to create attractive rural developments; and to respect existing

1 features of the rural landscape.

2
3 The preferred land use in the RC District is agriculture. The District is intended to permit a
4 range of uses related to agriculture, to encourage the preservation of large blocks of farmland,
5 and to permanently protect from development the tracts of land which remain after permitted
6 residential development has occurred. Residential lots in the district are likely to be adjacent or
7 close to agricultural land. Residents of property within the RC District should be prepared to
8 accept the impacts associated with normal farming practices (see the Howard County Right-To-
9 Farm Act in § 12.111 of the Howard County Code).

10
11 **G. Conditional Uses**

12
13 The following are conditional uses in the RC district, subject to the detailed requirements for
14 conditional uses given in Section 131. If there is a conflict between this Section and Section
15 131, Section 131 shall prevail.

18
19

20 **SECTION 105: RR (Rural Residential) District**

21
22 **A. Purpose**

23
24 The Rural Residential District is established to allow low density residential development
25 within a rural environment. The Rural Residential District is intended for an area of the County
26 which is already largely committed to low density residential subdivisions. Within the RR
27 District, agriculture is permitted as well as residential development in both cluster and non-
28 cluster forms. Cluster development is permitted in order to protect environmental and
29 landscape resources and to preserve agricultural land.
30

31 **G. Conditional Uses**

32
33 The following are conditional uses in the RR district, subject to the detailed requirements for
34 conditional uses given in Section 131. If there is a conflict between this Section and Section
35 131, Section 131 shall prevail.

2
3
4 **SECTION 107: R-ED (Residential: Environmental Development) District**

5
6 **A. Purpose**

7
8 The R-ED District is established to accommodate residential development at a density of two
9 dwelling units per net acre in areas with a high proportion of sensitive environmental and/or
10 historic resources. Protection of environmental and historic resources is to be achieved by
11 minimizing the amount of site disturbance and directing development to the most appropriate
12 areas of a site, away from sensitive resources. To accomplish this, the regulations allow site
13 planning flexibility and require that development proposals be evaluated in terms of their
14 effectiveness in minimizing alteration of existing topography, vegetation and the landscape
15 setting for historic structures.
16

17 **I. Conditional Uses**

18
19 The following are conditional uses in the RR district, subject to the detailed requirements for
20 conditional uses given in Section 131. If there is a conflict between this Section and Section
21 131, Section 131 shall prevail.

24
25

26 **SECTION 108: R-20 (Residential: Single) District**

27
28 **A. Purpose**

29
30 The R-20 District is established to permit single family detached dwelling units at
31 approximately two units per acre. The District reflects the established single-family
32 neighborhood characteristics of many of the stable residential areas of the county.
33
34
